

Project Requirements Document (PRD)

Fitness Coaching Mobile Application

January 2026

1 Introduction

1.1 Project Context

Many people who are enthusiastic about training and sports struggle to find reliable and structured guidance. Most users search for information across multiple platforms such as social media, websites, and videos, which often leads to confusion, misinformation, and inconsistent results.

To address this problem, this project aims to develop a mobile application that centralizes professional guidance by connecting users with qualified coaches. The application will allow clients to request training and nutrition plans from coaches, which may be offered as free, paid, or fully customized services.

Additionally, the platform will enable users to select specific fitness goals such as muscle building, fat loss, or general fitness improvement. By combining expert coaching with personalized plans in a single application, the solution aims to simplify access to accurate information, improve user outcomes, and enhance the overall training experience.

1.2 Project Objectives

The primary objective of this project is to provide a centralized and reliable mobile platform that connects fitness enthusiasts with professional coaches in order to deliver structured, personalized, and goal-oriented training and nutrition guidance.

The specific objectives of the project are:

- Simplify access to professional coaching for training and nutrition.
- Reduce misinformation by providing verified and structured plans.
- Enable users to select clear fitness goals such as muscle building, fat loss, or general fitness.
- Offer flexible coaching options, including free, paid, and customized plans.

- Improve user consistency, motivation, and fitness results through personalized guidance.

1.3 1.3 Target Users

The application is intended for the following categories of users:

- **Fitness Enthusiasts:** Individuals who practice sports regularly and seek structured training or nutrition guidance.
- **Beginners:** Users who are new to fitness and require clear, reliable, and easy-to-follow plans.
- **Professional Coaches:** Certified trainers and nutrition experts who wish to offer their services and manage clients digitally.

2 2. Project Scope

2.1 2.1 In-Scope (Included)

The project shall include the following features and functionalities:

- User authentication and registration with role selection (Coach or Client).
- Dedicated dashboards for coaches and clients.
- User profile management for both coaches and clients.
- A reporting system to track user progress and plans.
- A text-based messaging system between coaches and clients.
- Access to free training and nutrition plans.
- Purchase of paid training and nutrition plans.
- Request and delivery of fully customized training and nutrition plans.

2.2 2.2 Out-of-Scope (Excluded)

The following features are explicitly excluded from the current project scope:

- Cryptocurrency-based payment methods (subject to future consideration).

3 3. Functional Requirements

3.1 3.1 User Authentication and Access Control

- The system shall require users to create an account and log in before accessing any functionality.
- The system shall prevent unauthenticated users from accessing the application.
- The system shall support authentication using email and password.
- The system shall support authentication using Google login.

3.2 3.2 Client Functional Requirements

- The system shall allow clients to create and manage personal profile information.
- The system shall allow clients to access free training and nutrition plans.
- The system shall allow clients to purchase paid training and nutrition plans.
- The system shall allow clients to search for available coaches.
- The system shall allow clients to communicate with coaches through a text-based chat system.
- The system shall allow clients to request fully customized training and nutrition plans.
- The system shall allow clients to view reports related to their progress and subscribed plans.

3.3 3.3 Coach Functional Requirements

- The system shall allow coaches to create an account subject to verification using certifications or documents proving coaching qualifications.
- The system shall allow coaches to manage professional profile information.
- The system shall allow coaches to communicate with clients via a text-based chat system.
- The system shall allow coaches to create training and nutrition plans.
- The system shall allow coaches to offer plans as free, paid, or fully customized.
- The system shall allow coaches to personalize plans based on individual client needs.

- The system shall allow coaches to manage client requests for customized plans.

3.4 3.4 Administration Functional Requirements

- The system shall allow administrators to manage user accounts.
- The system shall allow administrators to manage coach accounts and verification status.
- The system shall allow administrators to approve, reject, or suspend coach accounts.
- The system shall allow administrators to monitor platform activity and interactions.

4 4. Non-Functional Requirements

4.1 4.1 Performance

- The system shall respond to user actions within a maximum of 2 seconds under normal operating conditions.
- The system shall support at least 1,000 concurrent users without performance degradation.
- The messaging system shall deliver messages in near real-time.

4.2 4.2 Security

- The system shall securely hash and store all user passwords.
- The system shall secure all data transmission using HTTPS.
- The system shall enforce role-based access control.
- The system shall secure all payment-related operations using compliant mechanisms.

4.3 4.3 Availability and Reliability

- The system shall maintain a minimum availability of 99%, excluding scheduled maintenance.
- The system shall include automated data backup mechanisms.
- The system shall recover automatically from minor failures.

4.4 4.4 Usability

- The system shall provide an intuitive and user-friendly interface.
- The system shall be usable by individuals with minimal technical expertise.
- The system shall maintain consistent navigation and design across all interfaces.

4.5 4.5 Scalability

- The system shall support future growth in users and coaches.
- The system shall allow the integration of new features without major redesign.

4.6 4.6 Compatibility

- The application shall be compatible with major mobile operating systems.
- The system shall support modern mobile and web browsers.

4.7 4.7 Maintainability

- The system shall follow a modular architecture.
- The system shall support easy maintenance and updates.
- The system shall include technical documentation for future development.

4.8 4.8 Legal and Compliance

- The system shall comply with applicable data protection regulations.
- The system shall obtain explicit user consent for data collection and processing.

5 5. Deliverables

Upon completion, the project shall deliver:

- A fully functional mobile application meeting all approved requirements.
- A closed-source application with restricted source code access.
- A secure and deployable production-ready version of the application.
- A comprehensive user manual for clients, coaches, and administrators.

- Assurance documentation covering reliability, security, and service continuity.
- Basic technical documentation describing system architecture and components.

6 6. Project Timeline

The total project duration shall not exceed one (1) month and will be structured as follows:

- **Requirements Validation and Design:** 1 week Requirements confirmation, UI/UX design, and stakeholder approval.
- **Development Phase:** 2 weeks Implementation of core functionalities including authentication, dashboards, messaging, and payments.
- **Testing and Quality Assurance:** 1 week Functional, performance, and security testing, followed by bug fixing.
- **Deployment and Documentation:** Conducted during the final week Application deployment, user manual preparation, and assurance delivery.
